## EDUCATION

---

**Vellore Institute of Technology, Vellore**

Aug 2023 – Jul 2027

*Bachelor of Technology – Computer Engineering*

**Bal Bharati Public School**

Apr 2009 – Mar 2023

## PROFESSIONAL AND LEADERSHIP EXPERIENCE

---

**AI Intern, Groz Engineering Tools Pvt. Ltd.**

Jul 2024 – Jan 2026

*Gurugram, Haryana – Full-Time – On-site*

Developed AI solutions for company's requirements like Application Tracking System, Product Recommendation chatbot using RAG and other technical help such as text extraction from old degraded documents using OCR.

## PROJECTS

---

### RAG-based Product Recommendation Chatbot

I built a RAG-based chatbot that recommends catalogue products tailored to user needs. It retrieves data from a vector database of product chunks and use cases via cosine similarity, optimizes the context with a BAAI reranker, and generates final recommendations using an LLM.

### NLP-Based Application Tracking System

I developed a self-hosted Applicant Tracking System (ATS) that uses an LLM to parse messy resumes into structured JSON data. It then scores candidates against job descriptions by matching relevant experience and key phrases using a Cross-Encoder and an IDF filter.

## VOLUNTEER WORK

---

Event planning and coordination as part of **VIT-STELLAR**, a student-run astronomy and science club at **VIT Vellore**. Assisted in organising outreach sessions and managing club logistics for more than a year.

## CERTIFICATION

---

IITD Generative AI Tools Workshop Certificate – Indian Institute of Technology, Delhi (May 2025)

## Research Paper

---

### **Digital Payment Dependency and Spending Behavior Among Young Adults — Independent Research (Ongoing)**

Conducting a primary quantitative study on how reliance on digital payments relates to impulsive spending and spending awareness among young adults. Designed and administered a Likert-scale survey, and analyzed the responses using descriptive statistics, reliability testing, and correlation analysis. Interpreting the findings through behavioral-economics frameworks such as the cashless effect and pain-of-paying to assess how reduced payment friction influences consumer spending.

**LANGUAGES:** Hindi (native), English (professional working proficiency), Japanese (elementary)

**TECHNICAL SKILLS:** Python, Scikit-Learn, C/C++, Git, Data Structures and Algorithms, Object-Oriented Programming, Machine Learning, Artificial Intelligence

**OTHER EDUCATION:** Artificial Intelligence, Machine Learning, Cryptography and Network Security, Computer Networks, Data Structures and Algorithms, Design and Analysis of Algorithms, Compiler Design, International Economics, Microeconomics

**INTERESTS:** Machine Learning, Economics, Music, Weightlifting
