EDUCATION

Vellore Institute of Technology

Vellore, Tamil Nadu, India

Bachelor of Technology in Computer Science and Engineering; GPA: 8.23/10.0

Aug 2023 – Jul 2027

- Relevant Coursework: Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Database Management Systems, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages: C/C++, Python, SQL

Developer Tools: Git, GitHub, VS Code, AWS, Linux, Jupyter Notebook

Core Competencies: Machine Learning, Deep Learning, Data Structures & Algorithms, Software Development, Problem Solving

PROJECTS

Hybrid Algorithm ML Chess Engine | *Python, PyTorch, Convolutional Neural Networks*

2024

- Built a chess engine combining traditional supervised learning algorithm with and reinforcement learning for a game playing chess engine.
- Trained convolutional neural networks on 50,000+ grandmaster games to predict optimal moves and position advantages
- Implemented efficient board representation using python library and move generation using only legal move set for model performance optimization
- Implemented a system for the model to play against stockfish and learn from its moves.

ML Online Fraud Detection System | *Python, Scikit-learn, Pandas, Flask, Machine Learning*

2024

- Developed a machine learning model to detect fraudulent online transactions with high accuracy using ensemble methods including Random Forest and Gradient Boosting algorithms
- Engineered features from transactional data and implemented data preprocessing pipelines handling imbalanced datasets
- Deployed the model using Flask API
- Optimized model performance through hyperparameter tuning and cross-validation

Minesweeper Game Hosted on AWS | *JavaScript, HTML/CSS, AWS EC2, RDS, CloudFront*

2024

- Designed and developed an interactive web-based Minesweeper game with responsive UI using vanilla JavaScript and modern CSS, supporting multiple difficulty levels
- Deployed scalable application on AWS infrastructure utilizing EC2 for compute, RDS for storing run times and implementing a leaderboard
- Implemented game logic algorithms including recursive reveal mechanism and optimized performance for smooth gameplay
- Configured AWS security groups and IAM policies following best practices for secure cloud deployment

EXPERIENCE

Senior Core Committee Member

Jul 2024 – Jan 2026

VIT-STELLAR (Space Technology Lab)

Vellore, Tamil Nadu, India

- * Collaborate with different teams to plan events, finances, design publicity material and assist the board in planning and decision making.
- * Manage junior member team and help complete tasks smoothly through leadership.
- * Participate in and plan technical workshops.
